The project uses a temporary strong name key, to run the code you need to use the following command:

- sn -Vr *,24b889c712735dc7

The project has external dependencies which have been removed. They need to be put in a folder called ExternalDependencies. The dependencies required are:

- Moq.dll (3.1.0.0)
- Microsoft.Practices.ServiceLocation.dll (1.0.0.0)
- Microsoft.Practices.Unity.dll (2.0.414.0)
- WixUtilExtension.dll (3.5.2519.0)

The icons have been replaced with placeholders.
